

Gift Card Measurements Lola Rist

Card Base:

8 ½ by 5 ½ inch scored at 3, 4 ¼, and 5 ½ inches.

Fold the 4 ¼ score line, then take a long die (I used the Deckled Dies) and cut a small section out of the fold line to make the pocket for gift card, certificate, check or money. See picture below:

Once your pocket opening has been cut, take tear and tape and adhere the bottom of the pocket - be sure to place the adhesive above the other score lines.

Cut mat or DSP at 2 $\frac{7}{8}$ by 5 $\frac{3}{8}$ and adhere to front of the booklet. Attach a white mat of the same size to the inside for your message. (FYI - the purple gift card holder does not have a mat, the green one has the mat and then the DSP measures 2 $\frac{3}{4}$ by 5 $\frac{1}{4}$.)

Next, fold the other score lines so that it forms a little booklet with the pocket inside. Take a piece of ribbon - apr. 16 inches - and tie around the booklet with the bow on the right side. Use tape to attach the ribbon to the

front of the DSP. Add your greeting label with dimensionals so the tape is completely covered, and embellish.

So many possibilities - graduation, baby shower, wedding, birthdays, you name it!!!
